

Biography
Glenn D Vogelsang MD PhD

I have been practicing in Family Medicine for almost 20 years post residency. I have done just about anything a Family Medicine physician could do for a rural practice. My most recent practices have been outpatient only, however, my residency training was Rural Family Medicine at Harpers Ferry, WV. I am board certified and recertified twice since the initial certification. I also have a doctoral degree in physiology and biophysics and previous to the PhD, I was in neuroscience research for 4 years; 2 years prior to my Masters in Toxicology and 2 years after the MS degree. My doctoral thesis was attempting to characterize the protein components of the pathology that is thought to either cause or occur as a result of Alzheimer's Disease. My Master's degree was evaluating the possible combination of pharmacological influences of digitalis glycosides which was previously a medication used in heart failure.

I am especially interested in preventive health maintenance as a way to prevent chronic health problems from becoming a major issue for increased risk of morbidity and mortality. I enjoy the part of medicine that helps people prevent heart attack, stroke or cancer. I will always be very instructive and help people understand the need or lack thereof for antibiotics. As the over prescription of antibiotics is second to only the over prescription of controlled substances, I also help people to get off the usually unnecessary use of these medications. I do a fair amount of minor procedures in the clinic which include those of the dermatological and orthopedic variety. I treat all ages and genders and all orientations. I treat everyone the same as if you were my own family.

I am married to a very lovely and talented lady named Cecilia. She is an excellent teacher and is great with children who are at the most challenging ages. She has a daughter Elena who will also be with us in St Francis and will attend the second half of her junior year and her entire senior year of high school (if she is good, LOL). I have four children; my oldest daughter (Ashlyn) is 23 and graduated from Elon University as a political science major and is living and working in Philadelphia. My second daughter (Morgan) is 22 and is a flight attendant for United Airlines. My oldest son (Austin) is 20 and is a sophomore at UNC Charlotte, studying architecture and my youngest son (Carter) is 18 and is a senior at Lee County HS in Sanford, NC.

I have an older brother (Leland) and a younger sister (Jeanne) who live in Syracuse, NY. My parents are (Lee) 85 and (Loretta) 84 and are not entirely well, but also live in Syracuse, NY. I grew up in a small town outside of Syracuse; Camillus, NY.

I enjoy playing golf, bowling, tennis and daily exercise to keep in shape. I also enjoy traveling and skiing at least once a year.

I am honored to have the opportunity to practice in the St Francis community and I am grateful for having been entrusted with the responsibility of delivering healthcare to the people of the Cheyenne County Hospital and Clinic. I hope I can be of some service to the hospital and the fine people of this community.
